PROFILE

Web Application Developer with 1+ year of hands-on experience building, deploying, and maintaining production-level government and internal web systems. Strong expertise in Laravel, Vue.js, MySQL, and Ubuntu servers, with experience in UAT, QA, system security, and user training. Proven ability to deliver scalable, reliable, and user-focused applications.

WORK EXPERIENCE

WEB APPLICATION DEVELOPER / SYSTEMS DEVELOPER (IT SUPPORT
OFFICER – SYSTEMS DEVELOPMENT)

Department of Human Settlements and Urban Development

October 2024 - January 2026

- Designed, developed, and maintained multiple internal and public-facing web systems supporting DHSUD operations across central and regional offices.
- Built and deployed web applications using Laravel, MySQL, Vue.js, and Blade, hosted on Ubuntu production servers..
- Performed production deployments, system updates, and ongoing maintenance to ensure system reliability and performance.
- Improved system security and reliability by identifying and resolving vulnerabilities.
- Conducted User Acceptance Testing (UAT) and Quality Assurance (QA) prior to system rollout.
- Provided system orientation and user training to ensure effective adoption by end users.
- Delivered ongoing technical support and troubleshooting for system-related issues.
- Managed source code versioning and collaboration using Git and GitHub.
- Assisted in SEO optimization and maintenance of the DHSUD official website.

FREELANCE PROJECT

Library Monitoring System – Full-Stack Developer (Aug 2025 – Nov 2025)

August 2025 - November 2025

- Developed a system with QR code scanning, book/member management, dashboards, reports, and procurement tracking.
- Built using Laravel, Vue.js, Bootstrap, and MySQL; deployed on Hostinger.
